Data Captured April 2024 – AirDNA

Your Data

This document is an amalgamation of data aggregated from the AirDNA dashboard using Tourism South East licence to the platform, the data was captured on April 8th 2024.

AirDNA is aplatform that monitors the performance data of 10 million properties listed on Airbnb, Vrbo, and holiday homes on booking.com, all of which are used for holiday rentals making it one of the most dominant players in this field.

It combines website data, real time property owner information, booking records, advanced algorithms, and rigorous quality checks to ensure a remarkable 95% accuracy rate. This level of precision has earned the trust of large-scale property investors and hedge fund managers, underscoring the reliability of the data.
